Active Minds® Presents The Evolution of Libya - Wed, Jan. 11, 2012 - 3:00-4:00PM

Gaining its independence in the aftermath of World War II, Libya struggled for 42 years under the totalitarian regime of Muammar Qaddafi. Vast oil reserves created enormous wealth, much of which Qaddafi spent on paramilitary and terrorist groups throughout the world. Declared a "state supporter of terrorism" at one point by the United States, Libya is now at a pivotal moment. The civil war that resulted in Qaddafi's death has positioned the country to write a new chapter in its history. Join Active Minds as we review the story of Libya and where it may head from here. RSVP requested.
